10 - Year benchmark G-Sec Movement

Macro Economic Update

- India's unemployment rate for persons aged 15 and above edged down to 6.7% in urban areas in the Oct–Dec 2025 quarter, compared with 6.9% in the previous quarter. Rural unemployment also declined to 4%, from 4.4% earlier. The survey also recorded higher self-employment and a rise in workforce participation, indicating an improving labour market.
- India's Consumer Price Index (CPI)-based inflation rose to 2.75% YoY in Jan 2026. The Jan 2026 data reflects a revision of the CPI base year to 2024. Under the updated structure, the weight of services has been increased, while the share assigned to food has been reduced.
- The Income Tax Department reported that over 24 lakh returns have remained unprocessed for more than 90 days, out of nearly 8.80 crore filings for Assessment Year 2025–26 as of Feb 4, 2026. The NUDGE campaign prompted 1.11 crore updated returns, generating Rs. 6,976.50 crore in additional taxes and bringing the total revenue impact to Rs. 8,810.59 crore.
- India's net direct tax collections rose 9.4% to Rs. 19.43 lakh crore till Feb 10, 2026, driven mainly by a 14.5% rise in corporate tax and a 5.9% increase in personal income tax, while refunds declined 18.82% to Rs. 3.34 lakh crore. Gross direct tax collections reached Rs. 22.78 lakh crore during the period.

Domestic Equity Market Update

- Domestic equity markets declined after rising in the previous two weeks, with benchmark indices BSE Sensex and Nifty 50 falling 1.14% and 0.87%, respectively.
- Domestic equity markets fell as the uplift seen earlier in the week following the U.S.–India trade deal failed to sustain momentum, with sentiment was undermined by fresh AI-related concerns as investors grew wary that Indian IT firms may face stronger competitive pressure from U.S.-listed technology peers.
- Losses deepened after stronger-than-expected U.S. labour market data showed the economy added 130,000 jobs in Jan 2026, while the unemployment rate fell to 4.3%, reducing expectations of near-term rate cuts by the U.S. Federal Reserve.
- On the BSE sectoral front, BSE IT fell 8.04% as information technology stocks came under intense selling pressure amid fears that new AI startups could disrupt traditional outsourcing models, threatening Indian IT's labour-intensive business structure, eroding pricing power, and displacing legacy service providers. Sentiment weakened further after Anthropic launched an upgraded version of its Claude AI model, which can handle longer and more complex tasks with improved reliability and stronger capabilities in coding and finance, heightening concerns that software companies are increasingly vulnerable as tools like Claude automate routine work.
- BSE Auto rose 2.29% after India and the U.S. announced the framework of their long awaited trade deal. Auto stocks also gained as passenger vehicle sales maintained strong momentum in Jan 2026, rising 12.6% YoY for the fourth consecutive month and indicating sustained domestic demand. This strength was supported by higher factory dispatches across passenger vehicles, two wheelers and three wheelers, reflecting firm consumer sentiment. The sector additionally benefited from the lasting impact of the GST rate reduction and supportive measures in the Union Budget 2026, which boosted confidence in its long term growth outlook.

Domestic Debt Market Update

- Bond yields fell after the weekly state debt auction drew robust demand, easing concerns about the market's underlying appetite for government securities. Gains were extended following a decline in U.S. Treasury yields. Yields fell further after the Jan 2026 inflation print came in softer than expected at 2.75% YoY. Sentiment was also bolstered by the government's decision to switch approximately Rs. 75,504 crore of securities maturing next year into longer-dated bonds held by the RBI, a move that effectively eased immediate supply concerns and improved the fiscal outlook.
- Yield on the 10-year benchmark paper (6.48% GS 2035) fell by 6 bps to close at 6.68% from the previous week's close of 6.74%.
- Data from Reserve Bank of India showed that money supply grew 12.0% on a yearly basis for the fortnight ended Jan 31, 2026, compared to an increase of 9.3% in the same period of the previous year. Bank Credit to Commercial Sector grew 14.1% on a yearly basis for the fortnight ended Jan 31, 2026, compared to an increase of 11.2% in the same period of the previous year.
