

Par Fund Investment Strategy Deck

Mar 2026

Risk Return Comparison – Different Product Lines

Product Lines	Level of initial Guarantees	Long Term Returns (Policyholder IRR)	Volatility in Maturity Values
Unit Linked	Nil	High	High
Participating	Low	Moderate	Low
Non-Participating	High	Moderate	Nil

Par Fund lies between both the extremes

- Participating Product structure intends to address the extremities in the “risk–reward” equation.
- There is low initial guarantee, however policyholders participate in the investment pool and gets credited with annual and terminal bonuses, thus increasing maturity IRRs. Once bonuses are credited, they cannot be reversed thus adding to the guarantees.
- With an investment strategy that usually allows equity investment, and with stable bonus rates, it generates optimum returns with considerably less volatility.

Consistent & Attractive Historical Fixed Income Yield

Yield of Par Fund

- The yield of Par Fund has been consistent historically and is now quite attractive.
- Across interest rate cycles, the yield of Par Fund has been maintained in-spite of fund inflows / outflows.
- With the market view that the interest rates nearing bottom, it is a good time for investors wanting to invest in Par fund to lock into relatively higher yields.

Well-Timed Duration Strategy Amid Volatile Yields

- $\% \text{ change in bond price} = (\text{Duration}) * \text{Change in interest rate (bond yield)}$
- For eg: If Modified Duration is 8 yrs , and if interest rate falls by 1%, then bond price will approx rise by 8%. Vice versa if interest rate rises.
- In a falling interest rate environment higher portfolio duration is preferred & vice-versa

Par Fund Modified Duration Vs 10 Yr G-Sec Yield

- The fund has managed to time interest rate cycles well. In the past, portfolio duration was increased as bond yields / interest rates softened (during year 2019-20 & 2023-24).
 - Higher portfolio duration in a falling interest rate environment (in the past too) has benefited the portfolio returns.
- However, with bond yields hardening in 2022, the portfolio duration had been reduced to contain the interest rate risk.
- Reducing portfolio duration with the view that interest rates are nearing their bottom

Long-Term Average Shows 95%+ Exposure in Sovereign & AAA Bonds

Credit Rating Break-up Trend							
Credit Rating	Mar-23	Dec-23	Mar-24	Nov-24	Mar-25	Dec-25	Mar-26
Sovereign	74%	72%	79%	69%	61%	61%	58%
AAA	21%	23%	18%	28%	36%	36%	35%
AA	2%	2%	0%	1%	2%	2%	2%
A & below	0.3%	0.3%	0.3%	0.5%	0.5%	0.3%	0.3%
Others (Treps, FD, Money Mkt)	2%	3%	2%	1%	1%	1%	3%
Total Bond Portfolio	100%	100%	100%	100%	100%	100%	100%
Sovereign & AAA	95%	95%	97%	97%	97%	96%	94%

- Par fund has historically maintained high credit quality. Data in the table shows that historically 95%+ (above) of the bond portfolio has been allocated to top-rated Sovereign and AAA segment.
- Allocation to A (and below) rated segment has been miniscule part of the bond portfolio historically. As of Mar 2026, only 0.3% of the bond portfolio is in A (& below) rated segment, and there is no allocation to default rating paper in the par fund portfolio.

Asset Allocation Trend of Par fund Portfolio

Asset Allocation Trend								
Asset Class	Mar-22	Dec-22	Mar-23	Dec-23	Nov-24	Mar-25	Dec-25	Mar-26
Equity	18%	19%	22%	23%	24%	24%	24%	20%
Sovereign Debt	58%	57%	58%	55%	53%	46%	47%	47%
Corporate Bonds	21%	21%	18%	19%	23%	29%	29%	31%
Money Mkt, FD & Others	3%	3%	2%	3%	1%	1%	1%	3%
Total	100%	100%	100%	100%	100%	100%	100%	100%

- Historically, a significant portion of the portfolio has remained allocated to Sovereign Debt / G-Secs, which consistently constituted ~50%+ of the portfolio across most periods, reflecting a strong focus on portfolio stability and credit quality.
- Over the recent periods, allocation towards Corporate Bonds has gradually increased (21% in Mar'22 to 31% in Mar'26), primarily driven by attractive spreads over G-Secs, while maintaining focus on high credit quality instruments (predominantly AAA-rated bonds).
- Equity exposure, which had increased to ~24% during stronger market phases, has been tactically reduced to 20% by Mar'26 amid recent market volatility/correction, supporting overall portfolio stability and downside management within the PAR fund.
